

YU-WEN CHEN

MACHINE LEARNING RESEARCHER - PHYSICAL AI & SATELLITE REMOTE SENSING

Ph.D. Candidate, Atmospheric & Oceanic Sciences | University of Colorado Boulder | NASA FINESST Graduate Fellow

Boulder, CO | +1-510-396-5924 | Yu-Wen.Chen@colorado.edu | in/yuwen-chen | github.com/ywchen-tw | yuwenchen.tw

PROFESSIONAL SUMMARY

Ph.D. Candidate specializing in **Physical AI** and spatiotemporal numerical modeling. NASA FINESST Graduate Fellow with a track record of architecting PyTorch pipelines that integrate physics simulations (radiative transfer) with deep learning (Transformers/CNNs). Expert in solving inverse problems and scaling training on large-scale datasets (3M+ frames).

SKILLS

Programming: Python (expert - daily for data analysis, simulation, and tooling/wrappers), Fortran (radiative-transfer / atmospheric model codebases), Bash/Shell scripting

Machine Learning & Deep Learning: PyTorch, DeepXDE, scikit-learn, Physics-Informed Neural Networks (PINNs), CNNs, LSTMs, Transformers, Diffusion Models, Gradient-Boosted Trees (XGBoost/GBDT), Deep Ensembles, Tabular Deep Learning (TabM)

Scientific Computing & Data: NumPy, Pandas, Xarray, SciPy, Numba (JIT), Matplotlib, NetCDF/HDF5 (h5py/pyhdf), Time Series Analysis, Statistical Inference, Bayesian Optimization, PCA / Dimensionality Reduction, Quantile Regression, Conformal Prediction & Uncertainty Quantification, Cross-Validation & Hyperparameter Optimization

High-Performance & Cloud Computing: Linux, HPC, SLURM (CU Research Computing), Git version control, AWS

Physical Modeling & Remote Sensing: 3D Radiative Transfer (EaR3T), Spatiotemporal Numerical Modeling, Satellite Remote Sensing, Inverse Problems, Multi-Sensor Satellite Collocation (OCO-2/MODIS), Geospatial Geometry (ECEF/WGS84, KD-Tree nearest-neighbor search)

AI-Augmented Development: Agentic AI tools (Claude, GitHub Copilot) across the research-to-production lifecycle - literature synthesis, experimental design, prototype-to-production scaling, automated pipeline engineering

Domain Expertise: Atmospheric Physics, Carbon Monitoring (OCO-2 / CO₂), Air Quality & Pollutant Transport, Chemistry

PROFESSIONAL EXPERIENCE

University of Colorado Boulder

Jan. 2022 - Present

NASA FINESST Graduate Fellow / Graduate Researcher

- NASA FINESST fellowship runs Dec. 2024 - Nov. 2026 (2 years).
- Used EaR3T 3D radiative transfer modeling to understand the physical mechanism of cloud-induced CO₂ retrieval biases and develop a physics-based correction method, achieving **76% error reduction** in cloud-adjacent scenes - published in *Atmos. Meas. Tech.* (2025).
- Advancing bias correction through spectral analysis: isolating 3D cloud-effect signatures encoded in OCO-2 spectra, then predicting and removing XCO₂ retrieval anomalies at scale with an ensemble of supervised models - gradient-boosted trees (XGBoost), deep ensembles with Gaussian-NLL heads, and tabular deep learning (TabM) - calibrated with conformal prediction for reliable uncertainty intervals and validated via date-blocked k-fold cross-validation.
- Built the OCO-2/MODIS collocation pipeline underlying this work: matching glint-mode OCO-2 footprints to Aqua MODIS cloud masks and computing per-sounding nearest-cloud distance via ECEF conversion and banded KD-Tree search, with Numba-accelerated processing on the CU Research Computing (SLURM) cluster.
- Applied agentic AI tools (Claude, GitHub Copilot) as both a **scientific research accelerator** (literature synthesis, hypothesis exploration, experimental design, results interpretation) and an **engineering accelerator** (scaled EaR3T prototype to production OCO-2 processing, automated end-to-end data workflows, optimized algorithm speed and memory, generated test and validation suites) - compressing the research-to-deployment cycle.

- Managed collaborations across 4 research institutes and presented findings at 9 international oral presentations and 10 poster presentations.

University of Colorado Boulder

Aug. 2024 - Present

Graduate Researcher - Arctic Surface Properties

- Engineered an automated intelligent system using Python to autonomously detect and correct sensor anomalies.
- Functioned as a **self-healing data agent** for high-fidelity Arctic radiometric measurements.
- Implemented instrument normalization protocols to standardize raw outputs from diverse radiometric sensors.

Academia Sinica, Research Center for Environmental Changes (RCEC)

Jan. 2019 - Jul. 2021

Research Assistant - Pollution Transport Analysis

- Developed autoregressive generative models (CNN/LSTM) to synthesize high-fidelity spatiotemporal sequences of ozone transport.
- Modeled non-linear dynamics of pollutant transport across complex terrain, leading to an oral presentation at **AI: Modeling Oceans and Climate Change (AIMOCC 2021) Workshop at ICLR 2021**.

EDUCATION

Ph.D., Atmospheric and Oceanic Sciences - University of Colorado Boulder (NASA FINESSST Fellow) Aug. 2021 - Dec. 2026 (expected)

M.S., Atmospheric and Oceanic Sciences - University of Colorado Boulder Aug. 2021 - May 2023

M.S., Chemistry - National Taiwan University Aug. 2016 - Jun. 2018

B.S., Chemistry (Minor: Atmospheric Science) - National Taiwan University Aug. 2013 - Jun. 2016

PRESENTATIONS

ORAL PRESENTATIONS (* PRESENTING AUTHOR)

1. **Introduction and Demonstration of the Education and Research 3D Radiative Transfer Toolbox (EaR3T)**
Yu-Wen Chen*, Sebastian Schmidt, Hong Chen, Ken Hirata, and Vikas Nataraja | Netherlands Institute for Space Research (SRON), Leiden, Netherlands | May 2026
2. **Mitigation of Cloud-induced Biases in CO₂ Remote Sensing**
Yu-Wen Chen*, Sebastian Schmidt, Hong Chen, and Steven T. Massie | Netherlands Institute for Space Research (SRON), Leiden, Netherlands | May 2026
3. **Spring- and Summertime Airborne Observations in the Arctic Suggest Prolonged Cloud-Induced Surface Melt**
Ken Hirata, **Yu-Wen Chen***, Sebastian Schmidt, Hong Chen, and Vikas Nataraja | ARCSIX Science Team Meeting 2026, Hampton, VA, US | April 2026
4. **Spring- and Summertime Airborne Observations in the Arctic Suggest Prolonged Cloud-Induced Surface Melt**
Yu-Wen Chen*, Sebastian Schmidt, Hong Chen, Ken Hirata, and Vikas Nataraja | University of Colorado Boulder, CO, US | April 2026
5. **Correcting Cloud-induced Biases in CO₂ Remote Sensing**
Yu-Wen Chen*, Sebastian Schmidt, Hong Chen, and Steven T. Massie | National Taiwan University, Taipei, Taiwan | January 2026
6. **The Impact of Polarization on OCO-2 Bias Mitigation in the Vicinity of Clouds**
Yu-Wen Chen*, Sebastian Schmidt, Steven T. Massie, and Susan S. Kulawik | 4th Advancement of POLarimetric Observations (APOLO), Kyoto, Japan | November 2024
7. **Satellite 3D Radiance Simulator for the OCO-2 Mission and its Application to the Mitigation of Spectroscopy Retrieval Biases in the Vicinity of Clouds**
Yu-Wen Chen*, Sebastian Schmidt, Steven T. Massie, and Susan S. Kulawik | International Radiation Symposium 2022, Thessaloniki, Greece | July 2022
8. **Investigating Ground-level Ozone Formation: A Case Study in Taiwan**
Yu-Wen Chen*, Sourav Medya, and Yi-Chun Chen | AI: Modeling Oceans and Climate Change (AIMOCC 2021) Workshop at ICLR 2021, virtual | May 2021
9. **Quantitation of glucose through its manipulation of the growth of Cu₂O/Ag nanoparticles**
Yu-Wen Chen*, Arun P. Periasamy, and Huan-Tsung Chang | Analytical Chemistry Technology Conference, Keelung, Taiwan | May 2018

POSTER PRESENTATIONS (* PRESENTING AUTHOR)

1. **The Impact of 3D Cloud Radiative Effect on Trace Gas Retrievals: Bridging the Gap from Low Earth Orbit to Geostationary Missions**
Yu-Wen Chen*, Sebastian Schmidt, Hong Chen, and Steven T. Massie | EGU General Assembly 2026, Vienna, Austria | May 2026
2. **Cloud-Induced Warming of Spring and Summer Arctic Sea Ice is Likely Underestimated by Passive Satellite Imagery Derived Products**
Yu-Wen Chen*, Sebastian Schmidt, Hong Chen, Ken Hirata, Vikas Nataraja, and Sebastian Becker | Radiation and Climate Gordon Research Conference 2025, Lewiston, ME, US | July 2025
3. **The Impact of Polarization on OCO-2 Bias Mitigation in the Vicinity of Clouds**
Yu-Wen Chen*, Sebastian Schmidt, Steven T. Massie, and Susan S. Kulawik | 4th Advancement of POLarimetric Observations, Kyoto, Japan | November 2024

4. **Mitigation of OCO-2 CO₂ Biases in the Vicinity of Cloud**
Yu-Wen Chen*, Sebastian Schmidt, Steven T. Massie, and Susan S. Kulawik | 20th International Workshop on Greenhouse Gas Measurements from Space, Boulder, CO, US | May 2024
5. **Mitigating the Impact of Three-Dimensional Cloud Effects on CO₂ Retrievals for Various Surface and Cloud Types Using a 3D Radiance Simulator**
Yu-Wen Chen*, Sebastian Schmidt, Steven T. Massie, and Susan S. Kulawik | AGU Fall Meeting 2023, San Francisco, CA, US | December 2023
6. **Mitigation of Satellite OCO-2 CO₂ Biases in the Vicinity of Clouds with 3D Calculations**
Yu-Wen Chen*, Sebastian Schmidt, Steven T. Massie, and Susan S. Kulawik | OCO-2/3 Science Team Meeting, Boulder, CO, US | October 2023
7. **The Impact of Clouds on the Orbiting Carbon Observatory-2 Satellite Trace Gas Retrievals**
Yu-Wen Chen*, Sebastian Schmidt, Steven T. Massie, and Susan S. Kulawik | Workshop Lille 2023, Lille, France | May 2023
8. **Mitigation of OCO-2 Spectroscopy Retrieval Biases in the Vicinity of Clouds**
Yu-Wen Chen*, Sebastian Schmidt, Steven T. Massie, and Susan S. Kulawik | OCO-2/3 Science Team Meeting, Boulder, CO, US | October 2022
9. **Intercomparison of aircraft and ground based measurements of pollutants and aerosols near major pollution sources over Taiwan**
Yu-Wen Chen*, Yi-Chun Chen, Charles C.-K. Chou, et al. | 18th Asian Chemical Congress, Taipei, Taiwan | December 2018
10. **Quantitation of Glucose through its Manipulation of the growth of Cu₂O/Ag Nanoparticles**
Yu-Wen Chen*, Arun P. Periasamy, and Huan-Tsung Chang | Graduate Student Poster Session, NTU Department of Chemistry, Taipei, Taiwan | June 2018

TEACHING EXPERIENCE

Weather and the Atmosphere

Fall 2021

Teaching Assistant - University of Colorado Boulder

- Assisted in general affairs for 350 undergraduate students.
- Led weekly lecture review and exam study guides.

High School Student Research

Sept. 2016 - Jul. 2018

Research Instructor - National Taiwan University

- Instructed three high school students on fuel cell research; students received Advanced Honor in the Young Scientists Development Program.

Analytical Chemistry Lecture

Spring 2017

Teaching Assistant - National Taiwan University

- Assisted in general affairs for 160 undergraduate students.
- Led weekly lecture review and discussion for study groups.

Analytical Chemistry Lab

Fall 2016, Spring 2017

Teaching Assistant - National Taiwan University

- Led weekly experiment review and guided laboratory experiments.

AWARDS & HONORS

- **NASA FINESST Award** (13% selection rate) - University of Colorado Boulder, 2024
- **Summer School for Inverse Modeling of Greenhouse Gases** - Colorado State University, 2024
- **Government Scholarship to Study Abroad** - Taiwan Ministry of Education, 2023
- **NASA Workshop Lille Travel Support** - University of Oklahoma, 2023
- **Best Popularity Award of Poster** - NTU Graduate Student Poster Session, 2018
- **Teaching Excellence Award** - National Taiwan University, 2017
- **NTU-Kanagawa University Chemistry Workshop** - Kanagawa University, Japan, 2014
